

The compact and affordable 125cc scooter.

On a limited budget? Thinking of buying a low-cost model from an unfamiliar manufacturer? Instead, check out the Vity.

Designed for riders who appreciate low running costs, the Vity is a classic-styled scooter that offers good engine and handling performance along with plenty of weather protection and underseat storage.

The Vity's reliable air-cooled 4-stroke 125cc engine features fuel injection for efficient and environmental friendly running. Its compact 10inch wheels and short wheelbase ensures stable, lightweight handling ideal for navigating busy city streets, while the front disc/rear drum brake combination gives you assured and effective stopping power.

- Strong and reliable 125cc scooter
- 4-stroke fuel-injected 125cc air-cooled engine
- Low running costs, low emissions
- Compact 10inch wheels for stability & easy handling
- Great, honest value for money
- Responsive front disc brake and rear drum brake

The practical, flexible choice

Our 125cc scooters combine city practicality with the power for longer trips. All models have 4-stroke single cylinder engines that combine performance, refinement and resilience, while disc brakes provide an additional level of security for assured stopping.

And there are a host of features to make longer rides more comfortable; large seats provide ample room for a pillion passenger, and the glove box and under seat storage are great for stowing those weekend-away essentials.

Combined with stylish instrument panels and piercing head and tail lights, and you have a machine that's as at home in the town as it is the country.

Reliable front disc brake

The Vity is equipped with a powerful 153 mm diameter front disc brake which - together with the rear drum brake - is designed to deliver the smooth and predictable stopping power necessary for controlling a scooter with a sturdy 125cc 4-stroke engine.

Compact 10inch wheels

The lightweight and compact 10inch diameter wheels are equipped with 100/90-10 tyres at the front and rear, and combined with a short/compact wheelbase this makes for quick steering, low rider inputs and easy low speed manoeuvrability. Finished in black, these stylish 3-spoke aluminium wheels add a touch of class to this affordable scooter.

Plenty of storage space

The comfortable dual seat can be easily unlocked and lifted up to reveal the spacious storage compartment. It's the ideal place to store your helmet, or other personal belongings. The Vity also offers valuable extra carrying capacity, thanks to an easily-accessible additional storage compartment in the steering column and a handy luggage rack.

Easy-to-read instrument panel

The Vity's clearly laid-out instrument panel features an analogue speedometer as well as a convenient fuel gauge, together with an array of indicator lights. All the vital information is ready to read and in an easy-to-understand layout.

Low seat height

At just 730 mm high, the sculpted dual seat makes for a low and extremely comfortable riding position. This modest seat height also keeps the overall centre of gravity low for easy manoeuvrability, and allows the rider to get their feet on the ground with ease.

Compact dimensions

The Vity has a wet weight of only 110 kg, and a wheelbase of just 1,250 mm, making it one of the smallest and lightest 125cc scooters in the class so it's ideally suited to a congested urban environment. And in combination with a powerful and reliable fuel-injected 125cc engine, you can navigate traffic and overtake with confidence.

ENGINE	
Type	Air-cooled 4-stroke, SOHC, 2-valve, forward-inclined, single cylinder
Displacement	125.0cc
Bore x stroke	51.5 x 60.0 mm
